# **INTERIM REPORT**

# **JANUARY-MARCH 2019**

### XMReality AB (publ), Interim Report, January-March 2019

XMReality delivered sustained and powerful growth in net sales during the first quarter of the year compared with the previous year. Software subscriptions dominated order intake and more than 50 companies now have ongoing subscriptions. At the end of the period, the company had prepaid but not yet recognized subscription revenue equal to about 60% of net sales for the full year 2018.

#### January-March 2019

- Net sales increased by 54.7% to SEK 3,021 thousand (1,953)
- Costs totaled SEK -11,132 thousand (-10,431)
- The net loss was SEK -5,712 thousand (-6,603)
- Net cash used in the period was SEK -6,590 thousand (-7,575) and the equity/assets ratio at the end of the period was 77.0% (84.5)

Total billing rose by 124% compared with the same period last year and subscription billing was up by more than 200%. The growth was achieved without appreciable cost increases, which reflects efficiency improvements and the potential of the business, in line with the Company's strategy.

Billed sales, which had not yet been recognized in revenue at the end of the period, increased by 134% to SEK 6,127 thousand (2,619). The increase is partly attributable to the order of SEK 1.5 million from a US defense group received in March. XMReality allocates prepaid subscription revenue across the term of the contract on a straight-line basis.

With an agile approach in all functions, XMReality further improved operational efficiency during the quarter. The company is also exploring the potential of automated sales and leads are increasingly being generated via digital media. During the quarter, XMReality completed the most extensive work with its offering thus far in preparation for expected new purchasing patterns.

There is a positive effect on cash flow in connection with billing, but the effect of orders received on profit and loss during the period is limited. Sales of hardware and services are recognized in revenue when the goods have been delivered or services rendered.

#### Significant events during the period of January-March 2019

- Bühler Consumer Foods signed an additional order and expanded the use of XMReality Remote Guidance worldwide.
- XMReality signed a software order worth SEK 1.5 million with a US defense group.
- Notice of annual general meeting of shareholders in XMReality AB (publ)

#### Significant events after the end of the quarter

• There were no significant events after the end of the period.

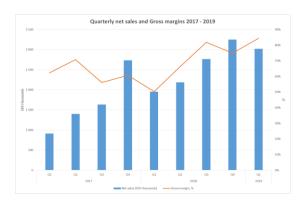

#### Message from the CEO

The powerful growth of XMReality in the Remote Guidance market continued during the period and organisational efficiency was further improved. With a marginally increased cost base, billing increased by 124% compared to the same quarter last year.

The strength of the subscription business is having clear impact in terms of more effective sales. Contractually agreed automatic extensions increase the billing basis with no need for renewed sales efforts. Accordingly, growing the share of billing generated by subscription renewals is of high strategic importance.

Software subscriptions, our core business, currently account for more than 80 percent of the company's total billing. XMReality expects that percentage to increase.

Several new customers placed orders in the first quarter. The company's biggest subscription order to date, worth SEK 1.5 million for the right of use, was received from a US defense group. Buhler Consumer Foods has expanded its use of XMReality Remote Guidance by applying the solution to enable their helpdesk to remotely assist Buhler's own personnel and integrating XMReality Remote Guidance in its service offering to its customers. Yet another famous brand, General Electric (GE) Healthcare France, was added to the long list of customers during the quarter.

The growth and maturity of the market is now clearly evident and major players are stepping up their efforts. Microsoft for example launched Hololens II, its new smart glasses platform, during the quarter. XMReality is also seeing higher interest from business system vendors, which are augmenting their offerings with Remote Guidance. Interest in the offering is growing along with the increasing numbers focusing on services related to Remote Guidance. With its intuitive and convenient subscription service, XMReality is standing up well to the growing competition.

Another sign that the Remote Guidance market is maturing is that customers have an increasingly clear understanding of how they can utilize the new technology. This is affecting our sales efforts and we are responding to the development by successively improving the efficiency of our marketing and sales processes.

The continued development of the web client, which allows customers to use the XMReality solution with non-registered users, is unlocking tremendous potential for complementary applications such as customer service related to IT support in the home, white goods support, and similar.

With a good first quarter put to bed, XMReality is looking forward to strong development in 2019.

Linköping 24 April, 2019

Johan Castevall Chief Executive Officer XMReality AB (publ)
